# World Horticultural Trade and U.S. Export Opportunities

## U.S. FROZEN POTATO FRY EXPORTS FINISH DECADE WITH RECORD HIGH TRENDS

Source: U.S. Census Bureau, USDA/NASS, and American Frozen Food Institute

Both quantity and value of U.S. frozen potato fry exports attained records of almost 475,000 metric tons and \$350 million in marketing year 1998/99. During the past 10 years, the quantity and value of U.S. frozen potato fry exports have consistently increased, particularly to East Asia, where the number of quick-service restaurants has expanded significantly. In 1998/99, East Asian countries accounted for over 80 percent of U.S. fry exports. Japan alone accounted for half of U.S. fry shipments with sales increasing to \$180 million from \$150 million after a year of sluggish sales following the Asian financial crisis. Unlike the previous year, export sales also increased for most of the other Asian markets, including China, Korea, and Taiwan. Expansion of the international fast-food industry, product quality, rising incomes, tariff reductions, and ongoing Market Access Program activities should continue to propel demand for U.S. frozen potato fries.

**EXPORT SUMMARY**

U.S. exports of horticultural products to all countries in October totaled \$924 million, down 8 percent from the same month a year earlier. Three out of the 15 categories registered increases. Categories with the most significant increases in October were hops and products (up \$1.4 million or 33 percent) and miscellaneous products (up \$35.9 million or 16 percent). The categories with the most significant decreases were fresh citrus (down \$18.8 million or 45 percent) and tree nuts (down \$65.6 million or 39 percent). The total value of complete fiscal year (FY) 1999 (October-September) U.S. horticultural exports was \$10.3 billion, the same as FY 1998.

## Situation and Outlook for Frozen Potato Fries

---

In 1999/2000, frozen potato fry exports from the 3 major exporting countries, the United States, the Netherlands, and Canada, are forecast at a record 2.4 million metric tons, 8 percent above the previous year's shipments. All three countries are expected to register export gains in 1999/2000 with Canada leading the trio in export growth. Canadian exports are forecast to increase 14 percent in 1999/2000 to 590,000 tons. Canadian exports have experienced double-digit growth rates for the past several years largely due to the expanding domestic processing industry. U.S. frozen potato fry exports reached a record \$345 million and 472,394 tons in 1998/99, almost double the volume and twice the value of just 5 years ago. U.S. fry exports are forecast to increase 10 percent in 1999/2000. Rising per capita incomes in many countries, expansion by multinational fast-food companies, and Market Access Program (MAP) activities, are expected to continue to spur demand for frozen potato fries. Japan is the largest U.S. market, accounting for over half of U.S. shipments.

---

### United States

The 1999 U.S. potato crop is estimated at 19.5 million tons, down 1 percent from a year ago but up 1 percent from 1997. The five Eastern and eight Central states experienced most of the decline, while production for the ten Western states is down slightly from last year, but fractionally above two years ago. The Western states account for almost 70 percent of total U.S. potato production with Idaho and Washington being the two primary producers.

About 28 percent of U.S. potato production is used to produce frozen potato fries. Today, Russet Burbank is the main variety grown for the production of frozen potato fries. With a relatively large U.S. potato crop and a steady domestic demand for fries, U.S. frozen potato fry production in 1999/2000 is forecast to rise slightly to 3.5 million tons. Over the past five years, U.S. production of frozen potato fries has increased over 2 percent annually. Most of the growth in U.S. frozen potato fry consumption comes from sales to the food service sector.

With the expansion of the multinational fast food companies, exports of frozen potato fries have risen significantly. In 1999/2000, U.S. exports of frozen fries are projected to increase 10 percent to a record 520,000 tons (or 13 percent of domestic fry production). In 1998/99, exports registered an 11-percent gain over the previous year.

The top five U.S. frozen potato fry markets accounted for nearly 70 percent of 1998/99 shipments. These countries include Japan with 51 percent of total exports; Hong Kong at 6 percent; and Mexico, Taiwan, and Canada with 5 percent each. The United States also exports to Europe but the outlook for U.S. exports of frozen potato fries to this market in the 1999/2000 season is dim, due to adequate supplies of fries in Europe. U.S. exports generally occur when potatoes are in short supply in Europe, such as in 1998/99, when U.S. fry exports were 9,946 tons.

Expansion of the international fast-food industry, product quality, rising incomes in many countries, and ongoing MAP activities have all played a role in stimulating demand for U.S. frozen potato fries. Export prospects for the next decade are very promising given the sustained expansion of the international fast-food industry.

### **Netherlands**

Dutch potato growers are expected to harvest a record 1999 crop, estimated at 5.8 million tons, an increase of 71 percent from the previous year. Potato yields were low in 1998 due to bad weather.

The Netherlands has the largest industrial frozen potato fry production in Europe with frozen fry production for 1998/99 at 1.3 million tons, up 8 percent from 1997/98. Frozen potato fry production accounts for 82 percent of total processing, while dried products, snack and various other products make up the remaining 18 percent.

The Dutch are by far the largest exporter of frozen potato fries in the world. While shipments to non-EU countries are very small, exports to these countries have more than quadrupled over the past four years. In 1998/99, Dutch exports totaled 1.2 million tons and for 1999/2000 exports are forecast to increase almost 6 percent. The industry depends largely on export demand, as almost 90 percent of production is sold in foreign markets--mostly in the European Union (EU). The United Kingdom, Germany, and France account for 60 percent of Dutch exports. According to Dutch industry sources, several factors contributed to stronger exports. First is the continued growth of quick service restaurants throughout the EU, particularly in southern Europe. Second, Holland's processors of frozen potatoes have expanded sales to markets outside of Europe, e.g., the Middle East and South America.

Imports of frozen potato fries into the Netherlands have remained small, accounting for less than 5 percent of total Dutch supply. Changes in frozen potato fry inventories are not available but may have an impact on 1999/2000 total supply and distribution.

## Canada

Reacting to strong domestic and foreign demand for frozen potato fries, Canadian potato farmers continue to expand planted area. Western Canada potato area has demonstrated rapid growth throughout the 1990's, led by Manitoba and Alberta. The prairie region now accounts for nearly one-third of total Canadian potato output compared to about 25 percent ten years ago. By 2000, Alberta potato acreage is forecast to be nearly 20,000 acres higher than the record acreage just years earlier. The total Canadian potato harvest for the 1999 crop year is estimated at 4.2 million tons, slightly lower than the previous year.

The production of frozen potato fries in Canada continues to show strong expansion. Canada's fry production rose 6 percent in 1998/99 to 910,000 tons and is forecast to increase more than 8 percent during the current marketing year (1999/2000). Much of the increase reflects the startup of state-of-the-art potato processing plants in Alberta. The outlook for 2000/2001 is for a further increase in Canadian frozen potato fry production as processors continue to invest heavily in new potato processing plants in the western provinces.

A Canadian processor started construction of a new C\$90-million potato-processing facility last spring in Alberta, which is expected to be in commercial operation soon. The plant is expected to produce 200 million pounds of potato products annually.

Canadian frozen potato fry producers increasingly depend on exports for additional sales. Exports in 1998/99 increased 15 percent to a record 516,240 tons, reflecting expansion of french fry capacity in the western provinces and increased production for export to the U.S. food service market. During this period, exports of fries to the United States grew 10 percent to 367,365 tons, valued at \$230 million. Canadian fry exports are expected to continue at double-digit growth rates for the near future. Construction of new processing facilities, contracts to supply major U.S. fast food companies, and a lower-valued Canadian dollar continue to fuel the growth in export demand. Other Canadian export markets include Japan, the United Kingdom, Venezuela, Guatemala, Chile, and Saudi Arabia. An increase in exports to the Pacific Rim countries is expected given the expansion in processing capacity.

Canadian imports of U.S. frozen potato fries have been flat for the past two years after several years of strong growth. Small increases are projected for the future given Canada's revisions to package size requirements, albeit tempered by a strong U.S. dollar and increased Canadian production.

## Japan

Japanese production of frozen potatoes is relatively small and continues to decline as farmers focus on the more profitable fresh market. In 1998/99, less than 2 percent of Japan's total potato crop was processed. Hokkaido, northern islands of Japan, accounts for over 80 percent of the nation's fresh potato production.

In spite of Japan's sluggish economy, imports of frozen potato fries continue to grow at an annual rate of 8 to 10 percent. In 1998/99, frozen potato fry imports were 269,566 tons, up from the previous year's level of 250,786 tons. Japanese traders of frozen potato products anticipate export shipments to approach 300,000 tons in the upcoming year. Growth in frozen potato fries is correlated with rising sales in Japan's fast food chains and western style restaurants. The United States supplied 90 percent of Japan's frozen potato fry imports. Canada accounts for nearly all of the remaining imports, with sales of 24,000 tons last year.

As elsewhere in the world, most fries (nearly 90 percent) in Japan are consumed at international fast-food chains, followed by family restaurants, "izakaya" (snack bars), and other food service outlets. Japan's home consumption of frozen potato fries through retail outlets is fairly small (approximately 5 percent of total distribution).

Japan has more than 6,500 fast-food shops. One international food chain consumes over 50 percent of the nation's frozen potato fries or 120,000 tons annually through its 3,000 outlets nationwide. Together the fast-food shops consume nearly 70 percent of the nation's total distribution of frozen potato products. Japan's 5,500 family restaurants also consume a significant volume of frozen potato fries, featured throughout the year in their western style menus.

*(The FAS Attache Report search engine contains reports on the Frozen Potato Fry industries for 4 countries, including, Canada, the Netherlands, Japan, and Taiwan. For further information on supply, distribution, trade, and U.S. marketing opportunities, contact Ted Goldammer at 202-720-8498.)*

## **World Trade Situation and Policy Updates**

### **China's Shaanxi Province Increases Fruit Production**

This year Shaanxi province devoted over 670,000 hectares to fruit production making it the fourth-largest producing province in the country. In contrast, total bearing area for non-citrus fruit in the United States in 1998 was 887,108 hectares. Shaanxi is expected to harvest 5.5 million tons of fruit this year accounting for 10 percent of China's total output. Production is expected to reach 8 million tons in the next three years. Apple production for 1999 is up 30 percent to a total 4.5 million tons. Apple production in the United States for 1999 is forecast at 4.8 million tons. Shaanxi province is expected to produce 110,000 tons of kiwifruit, accounting for two thirds of China's total output. China's 1999 kiwifruit production is forecast at 165,000 tons and is the world's third-largest producer after Italy which produces around 280,000 tons and New Zealand which normally produces 230,000 tons. China's consumption of kiwifruit is strong. The country is a net importer of the fruit, bringing in 2,000 to 3,000 tons a year from New Zealand.

### **Vegetables Overtake Rice as Top Farm Crop in Japan**

According to the U.S. Agricultural Minister-Counselor in Tokyo, production of vegetables in Japan in 1998 increased 13 percent in value terms to 2.61 trillion yen (\$24.9 billion dollars), exceeding the farm value of the domestic rice crop for the first time ever. The Ministry of Agriculture, Forestry and Fisheries (MAFF) reported that the total farm value of rice production in 1998 was 2.54 trillion yen, followed by livestock production at 2.43 trillion yen. U.S. exports of fresh and chilled vegetables to Japan in 1998 totaled \$138 million, down 5 percent from 1997 and 30 percent from the 1995 record. During the first 9 months of 1999, U.S. fresh and chilled vegetable exports to Japan rebounded to \$113 million, up 19 percent from the same period in 1998. Broccoli, cauliflower, asparagus, onions, lettuce and kohlrabi accounted for the bulk of the value. U.S. exports of fresh tomatoes to Japan in the first nine months of 1999 increased 80 percent to \$1.0 million over the same period in 1998.

### **Prospects Look Good for New Florida Citrus Protocol with the Philippines**

During the final stages of an FAS-financed (EMO TIRF) and APHIS-led Philippine plant quarantine delegation visit to the United States the week of November 17, the Director of the Philippine Bureau of Plant Industry verbally agreed to add Florida oranges and tangerines to a protocol for Florida grapefruit which had been finalized in May 1999. Per the original protocol, the Philippine plant officials inspected and certified the first commercial export shipment of Florida grapefruit, thus effectively launching a projected \$2-million market. The market potential for other Florida citrus products is estimated to be worth an additional \$2 million. The Philippines has become an important market for a range of U.S. fresh fruits, notably grapes, apples, and oranges. Fresh fruit shipments

to the Philippines topped \$36 million in calendar year (CY) 1997, before falling off sharply in 1998 due to the economic downturn in the region. However, exports through the first 9 months of 1999 were up over 25 percent from a year earlier, reflecting a general recovery in the market.

### **China to Regulate U.S. Solid Wood Packing Materials**

The Peoples' Republic of China has announced its intention to require heat treatment of solid wood packing materials that are made from U.S. conifers beginning January 1, 2000. The proposed regulation will apply to shipments from the United States and Japan. According to Chinese officials, coniferous solid wood packing materials from the United States have been found to carry pinewood nematode, a pest associated with pine wilt disease. According to reports, this pest has been intercepted 44 times in U.S. shipments to China since October 1998. The pinewood nematode has been found in five provinces of China and is under official control. A pest risk assessment has been prepared by the Chinese government addressing the issue. China is the latest addition to the list of countries, including the United States and Canada, that regulate solid wood packing material to prevent the introduction of new pests.

### **USDA Amends User Fee Regulations for APHIS Services**

Effective December 16, 1999, the U.S. Department of Agriculture (USDA) will adjust the user fees charged for agricultural quarantine and inspection activities to reflect the anticipated actual costs of providing these services through fiscal year 2002. A detailed description of the fee changes and the agency's responses to comments received on the final rule are available on the internet at <http://www.aphis.usda.gov/ppd/rad/webrepor.html>.

### **Argentina Lifts Quarantine on U.S. Blueberry Plants**

Argentina has lifted a 2-year quarantine on U.S. blueberry plants and the importation of such plants is now possible immediately. The Argentine government was worried about the introduction of the fungus *phomopsis vacinni* (twig blight) not previously reported to exist in that country. Once it became apparent that Argentina already had this fungus, the quarantine on U.S. blueberries was lifted. Argentina's reinstatement of import permits for blueberry plants could mean more than \$200,000 annually for U.S. producers in Florida, Michigan, North Carolina, and Oregon, according to APHIS estimates.

## **Trinational Dispute Resolution Corporation Open to All Produce Companies in NAFTA Area**

The Dispute Resolution Corporation (DRC) is a private non-profit organization of produce companies in the NAFTA region dedicated to providing dispute resolution services. The objective of the organization is to set up a single system for fair and ethical trading practices across North America by adopting fair trade standards adapted from existing American and Canadian rules and by providing efficient services for resolving disputes. These services are provided by a combination of in-house staff and outside organizations experienced in mediating and arbitrating disputes between produce companies (e.g. Blue Book and Commercial Arbitration and Mediation Center for the Americas). Mediated settlements and/or arbitral decisions of the DRC will be fully enforceable in the courts of all three NAFTA countries. To learn more about the DRC, contact the Fruit and Vegetable Dispute Resolution Corporation, Tel (613) 226-4187, Fax (613) 226-2984.

## **Low Almond Prices Severely Impact Export Value Despite Record Volume Exports**

Trade value for almond exports has dropped drastically in recent months despite very strong export demand. Large production increases in the United States, which supplies 75 percent of the world's almonds, coupled with large U.S. stocks, have pushed world supplies to record levels and further depressed already low almond prices. Blue Diamond Growers, the large California-based cooperative, reports current grower prices of \$.75/lb, a price at or sometimes below the cost of production and 46 percent lower than last year's almond prices. Larger output, significantly reduced prices, and a weakening U.S. dollar have greatly boosted U.S. almond exports this year. However, the increase in export volume has not been sufficient to offset the steep decline in almond prices. Almond export value through the first three months of the 1999/2000 season (August-October) is down 33 percent from the same period last year. Almonds are the top-value U.S. horticultural export, with an average annual export value of \$812 million over the past four years.

## **Champagne and Sparkling Wine Prices Rise, But Shortage Rumors Unfounded**

Although it is estimated that several billion bottles of champagne and sparkling wine will be consumed at millennium celebrations, a resulting overall shortage of champagne and sparkling wine is not anticipated. However, there are existing shortages of certain popular and high-end brands (over \$50 and mainly French) because they are typically produced in fairly limited quantities. Over the last year, prices for champagne and sparkling wines have risen by 10 to 20 percent, mainly the result of media hype. U.S. imports of champagne and sparkling wine have increased over 50 percent by value and volume for the first 10 months of 1999 over the same period for 1998. Meanwhile, U.S. exports of sparkling wine have fallen almost 20 percent by value and volume over this same

period, mostly due to domestic suppliers preferring to supply the surge in domestic demand for champagne and sparkling wine for millennium celebrations.

## **CODEX & WTO**

The General Principles of the Codex Alimentarius is "to guide and promote the elaboration and establishment of definitions and requirements for foods to assist in their harmonization and in doing so to facilitate international trade." The Uruguay Round Agreements represent a milestone in the multilateral trading system because, for the first time, they incorporated agriculture and food under operationally effective rules and disciplines. Country participants in the round of negotiations recognized that measures ostensibly adopted by national governments to protect the health of their consumers, animals and plants could become disguised barriers to trade as well as being discriminatory. Consequently, the Sanitary and Phytosanitary Standards (SPS) and the Technical Barriers to Trade (TBT) Agreements were included among the Multilateral Agreements on Trade in Goods during the Uruguay Round.

The SPS Agreement acknowledges that governments have the right to take sanitary and phytosanitary measures necessary for the protection of human health. However, the SPS Agreement requires them to apply those measures only to the extent required to protect human health. It does not permit Member Governments to discriminate by applying different requirements to different countries where the same or similar conditions prevail, unless there is sufficient scientific justification for doing so. The TBT Agreement seeks to ensure that technical regulations and standards, including packaging, marking and labelling requirements, and analytical procedures for assessing conformity with technical regulations and standards do not create unnecessary obstacles to trade.

It is noteworthy that the SPS and TBT Agreements both acknowledge the importance of harmonizing standards internationally so as to minimize or eliminate the risk of sanitary, phytosanitary and other technical standards becoming barriers to trade. In its pursuance of harmonization, with regard to food safety, the SPS Agreement has identified and chosen the standards, guidelines and recommendations established by the Codex Alimentarius Commission for food additives, veterinary drug and pesticide residues, contaminants, methods of analysis and sampling, and codes and guidelines of hygienic practice. This means that Codex standards are considered scientifically justified and are accepted as the benchmarks against which national measures and regulations are evaluated.

Considerable interest in the Commission's activities has been stimulated by the specific recognition of Codex standards, guidelines and recommendations within the SPS Agreement as well as the importance assumed by Codex standards in the TBT Agreement. Consequently, attendance at Codex meetings, especially by developing countries, has markedly increased. This is a welcome development, particularly since both Agreements direct members, within the limits of their resources, "to play a full part" in the work of international standards organizations and their

subsidiaries. The adoption of Codex standards as scientifically justified norms for the purpose of the SPS and TBT Agreements is of immense significance. The standards have become an integral part of the legal framework within which international trade is being facilitated through harmonization. Already, they have been used as the benchmark in international trade disputes, and it is expected that they will be used increasingly in this regard.

For this reason, exporters should be attentive to the work being performed in the various committees. Of particular interest to companies in the horticultural and tropical products sector might be the Codex Committee on Food Hygiene; Sugars; Processed Fruits and Vegetables; Fruit Juices; Fresh Fruits and Vegetables; Cocoa Products and Chocolate; Food Import and Export Certification and Inspection; Food Additives and Contaminants; Pesticide Residues; Biotechnology; Methods of Analysis and Sampling; and Food Labeling.

The following two internet addresses are invaluable for obtaining a report on the most recent meetings and for obtaining the provisional agendas and working papers for up-coming meetings:

## **Organic Updates**

### **Germany's Organic Sector**

Germany is one of the world's major producers and consumers of organic food products. By the end of 1998, 8,277 farms were registered as organic, and 417,000 hectares (1,030,000 acres) or 2.5 percent of Germany's agricultural land was under organic production. About half of the organically-farmed land was devoted to field crops and the rest to grass and pasture. Germany produces a wide variety of organic commodities including milk, grains (wheat, rye and oats), potatoes and other vegetables, beef, oilseeds, pulses, fruit and wine.

Organic food sales in Germany were estimated at \$2 billion in 1998, or approximately 2 percent of the total food market. Opinion polls indicate that the average consumer is becoming more interested in organic food, but that demand is dampened somewhat by confusing labels, high prices, limited availability in mainstream markets compared to other western European countries, and limited variety.

Italy and Spain are Germany's leading foreign suppliers of organic products, and the United States is believed to be the largest non-EU supplier. Increasingly, organic commodities and products from China, Latin America, and Central European countries such as Poland and Hungary are finding their way to Germany.

Best prospects for U.S. exporters of organic products include uniquely American items which are already familiar to consumers of non-organic food, as well as dried fruit, nuts, wine, rice, sports drinks and supplements.

### **News from the United Kingdom**

Following are tidbits on organics in the United Kingdom gleaned from media reports:

- According to Datamonitor, sales of organic food in Western Europe have grown from \$3.1 billion in 1995, to an estimated \$5.3 billion in 1999. The U.K. organic market more than doubled in size from \$228 million in 1995 to \$544.3 million in 1998. Imports continue to account for about 70 percent of organic food sold.
- According to Mintel, a U.K. market research firm, limited availability and high prices are dampening growth in organic food consumption. Mintel reports that 70 percent of U.K. consumers want to buy organics, but many are put off by the cost. Fresh produce, meat and dairy are the most dynamic sectors, and fastest growing categories are baby food, organic bread, tea and coffee. [Note: Mintel also reports that the United Kingdom will spend over £2.7

billion (\$4.3 billion) this year on American-style fast food including burgers, pizza and chicken--more than France, Italy and Spain, combined.]

- The U.K. Ministry of Agriculture, Fisheries, and Food has reopened the Organic Farming Scheme, which supports U.K. farmers as they convert to organic production methods. The scheme exhausted its £16 million (\$25.8 million) funds in September after just six months. Another £10 million (\$16.1 million) was allocated in November 1999.

### **Members of USDA's Advisory Committee on Small Farms Named**

On December 6, Secretary Glickman named 19 individuals to serve on USDA's Advisory Committee on Small Farms. In announcing the appointments, Secretary Glickman stated that he "will rely on this committee to provide insight and input on actions to strengthen USDA programs that contribute to the viability and growth of small farms and ranches." One member of the committee, George L. Siemon, is a farmer and CEO of Organic Valley Cooperative, based in Wisconsin. According to the Organic Valley web site, the farmer-owned and operated marketing cooperative represents more than 190 farm families in ten states. The co-op is the largest producer of certified organic dairy products in the United States, and distributes them, as well as organic eggs, meats and vegetables, nationally.

*(For further information, contact Janise Zygmunt (analysis) at 202-720-1176 or Kelly Strzelecki (marketing) at 202-690-1341.)*

## **Export News and Opportunities**

### **USDA Extends Credit Guarantees to Indonesia**

Since November 26, USDA has authorized credit guarantees for sales of U.S. agricultural commodities to Indonesia under the Export Credit Guarantee Program (GSM-102) for FY 2000. USDA authorized \$400 million in credit guarantees for sales of U.S. agricultural commodities to Indonesia.

Exporters may apply for credit guarantees on a first-come, first-served basis to cover sales of any of the commodities specified in the GSM list of commodities published in FAS program announcement PR 0450-99, issued October 1, 1999, or as superseded. The list of eligible commodities will apply to all individual country and regional announcements unless otherwise stated in the announcements. The following horticultural products are eligible under the export credit guarantee programs for FY 2000: dried fruit; fresh fruit; frozen fruit; canned fruit; 100-percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; beer; tree nuts; fresh vegetables; canned vegetables; dried vegetables; wine; and brandy. From time to time, this list may be amended as additional commodities become eligible. The allocation does not assign dollar amounts to any of the commodities specified in the GSM list of commodities, providing buyers and sellers maximum flexibility in arranging the size of their transactions within the scope of the overall allocation.

The GSM-102 program makes available credit guarantees for sales of U.S. agricultural commodities overseas. USDA does not provide financing, but guarantees payments due from foreign banks. USDA typically guarantees 98 percent of the principal and a portion of the interest. The GSM-102 program covers credit terms from 90 days to 3 years.

Under the program, once a firm sale exists, the qualified U.S. exporter applies for a payment guarantee before the date of export. The U.S. exporter pays a fee calculated on the dollar amount guaranteed, based on a schedule of rates applicable to different lengths of credit periods. The Commodity Credit Corporation (CCC)-approved foreign bank issues a dollar-denominated, irrevocable letter of credit in favor of the U.S. exporter, ordinarily advised or confirmed by the financial institution in the United States agreeing to extend credit to the foreign bank. The U.S. exporter may negotiate an arrangement to be paid as exports occur by assigning the U.S. financial institution the right to proceeds that may become payable under the guarantee, and later presenting required documents to that financial institution. Such documents normally include a copy of the export report.

If a foreign bank fails to make any payment as agreed, the exporter or the assignee may file a claim with USDA for the amounts due and covered by the guarantee. USDA will pay the U.S. bank and will take on the responsibility of collecting the overdue amount from the foreign bank.

Additional information about the GSM-102 program, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the internet at:

**<http://www.fas.usda.gov/excredits/exp-cred-guar.html>**

### **USDA Extends Supplier Credit Guarantees to Azerbaijan**

Since December 13, USDA has authorized \$5 million in supplier credit guarantees for sales of U.S. agricultural commodities to Azerbaijan under the Supplier Credit Guarantee Program (SCGP) for FY 2000.

USDA has amended the Commodity Credit Corporation's SCGP for the Southeast Asia Region for FY 2000 to change the country destinations. Eligible destinations are Indonesia, Malaysia, the Philippines, and Thailand.

Exporters may apply for credit guarantees on a first-come-first-served basis to cover sales of any of the eligible commodities. The following horticultural products are eligible under the SCGP: dried fruit; fresh fruit; 100-percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; tree nuts; fresh vegetables; canned vegetables; dried vegetables; wine; and brandy.

This list of eligible commodities will apply to all individual country and regional SCGP announcements unless otherwise stated in the announcements.

The SCGP is unique because it covers short-term financing extended directly by U.S. exporters to foreign buyers and requires that the importers sign a promissory note in case of default on the CCC-backed payment guarantee. The SCGP emphasizes high-value and value-added products, but may include commodities or products that also have been programmed under the GSM-102 program.

The table on page 19 presents the FY 2000 SCGP's for which USDA has authorized credit guarantees for sales of U.S. horticultural products as of December 16, 1999. Additional information about the SCGP, regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity may be accessed on the internet at:

**<http://www.fas.usda.gov/excredits/scgp.html>**

The General Sales Manager will consider requests to establish a SCGP and/or GSM Program for a country or region or amend an authorized program to include horticultural commodities and products which are currently not eligible.

The SCGP encourages exports to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without CCC guarantees. Under the SCGP, CCC guarantees a portion of payments due from importers under short-term financing (up to 180 days) that exporters have extended directly to the importers for the purchase of U.S. agricultural commodities and products. These direct credits must be secured by promissory notes signed by the importers. CCC does not provide financing but guarantees payment due from the importer.

Program announcements which can be accessed on the internet provide information on specific country and commodity allocations, length of credit periods, the required form of promissory note, and other program information and requirements.

(For further information on the SCGP or GSM-102 Program for horticultural commodities, contact Yvette Wedderburn Bomersheim, (202) 720-0911 or Elizabeth Mello (202) 720-9903).

# Bring the Future into Focus.

## Agricultural Outlook Forum 2000

- Commodity Outlook, 2000 and Beyond
- Coming to Terms with Biotechnology
- Future of Farming and Rural America
- Farming under Contract
- Impact of Agribusiness Mergers
- New Markets: E-Commerce, Organic Foods, Biomass
- WTO Talks, Animal & Plant Health Trade Rules

Bring your future into focus at the U.S. Department of Agriculture's Outlook Forum 2000. Hear industry leaders, producers and top officials discuss issues confronting agriculture. Receive up-to-date commodity forecasts plus new 10-year projections. Network with hundreds of experts from agriculture, business and government at this popular event.

For program and registration details, access the Forum web site, send e-mail to [agforum@oce.usda.gov](mailto:agforum@oce.usda.gov), or call 202-720-3050. *Register today; rates go up after February 1.*

February 24-25, 2000 • Arlington, Virginia

# NTIS Order Form For FAS Subscriptions

U.S. DEPARTMENT OF COMMERCE  
Technology Administration  
National Technical Information Service  
Springfield, VA 22161

To order subscriptions, call 1-800-363-2068 or (703) 605-6060.  
TDD (for hearing impaired only), call (703) 487-4639.

## SHIP TO ADDRESS

CUSTOMER MASTER NUMBER (IF KNOWN)		DATE	
ATTENTION/NAME			
ORGANIZATION		DIVISION / ROOM NUMBER	
STREET ADDRESS			
CITY		STATE	ZIP CODE
PROVINCE / TERRITORY		INTERNATIONAL POSTAL CODE	
COUNTRY			
PHONE NUMBER ( )		FAX NUMBER ( )	
CONTACT NAME		INTERNET E-MAIL ADDRESS	

1-800-363-2068 or (703) 605-6060

Fax this form to (703) 605-6880

To verify receipt of your fax order, call (703) 605-6060.

## METHOD OF PAYMENT

☐ VISA ☐ MasterCard ☐ American Express ☐ Discover

CREDIT CARD NUMBER EXPIRATION DATE

CARDHOLDER'S NAME

☐ NTIS Deposit Account Number:

☐ Check/Money Order enclosed for \$ (PAYABLE TO NTIS IN U.S. DOLLARS)

## RETURN POLICY

Although NTIS cannot accept returns for credit or refund, we will gladly replace any item you requested if we made an error in filling your order, if the item received was defective, or if you received it in damaged condition. Call our Customer Service Department at 1-888-584-8332 or (703) 605-6050.

## SINGLE COPIES

To order, call NTIS Sales Desk 1-800-553-NTIS (6847) or (703) 605-6000, fax to (703) 605-6900; or E-mail to: [orders@ntis.fedworld.gov](mailto:orders@ntis.fedworld.gov).

For single copies, add \$5 handling fee per total order for U.S., Canada, Mexico; \$10 per total order for all other countries. RUSH service is available for an additional fee; please call the NTIS Sales Desk for details.

**Now Available On-Line**

Summaries and selected tables from many Foreign Agricultural Service world market and trade reports are available electronically. The reports include U.S. Export Sales (available electronically after 8:30 a.m. on release day); Grain: World Markets and Trade; Oilseeds: World Markets and Trade; Cotton: World Markets and Trade; Tobacco: World Markets and Trade; World Agricultural Production; the early release version of World Horticultural Products and U.S. Export Opportunities; and Tropical Products: World Markets and Trade (all available electronically after 3:00 p.m. Washington DC time on release day) as well as Sugar: World Markets and Trade; Livestock and Poultry: World Markets and Trade; Dairy: World Markets and Trade, and U.S. Planting Seed Trade (available within a week after release.)

You can read the reports on the FAS home page (<http://www.fas.usda.gov>). The reports remain "current" until the succeeding issue is available. Older issues are available in the archives section of the home page. We also make selected cover articles and graphics available from these publications, in a separate section of the site. Reports are also available from the Economic Bulletin Board at Stat-USA, on the same schedule. For more information, you may contact Stat-USA at (202) 482-1986 (Monday-Friday, 8:30-5:30 p.m. Washington, DC time.)

For more information on the FAS home page, contact Glenn Kaup, tel. (202) 720-3329; fax. (202) 720-3229; or via e-mail [kaup@fas.usda.gov](mailto:kaup@fas.usda.gov)
